

QUALITY POLICY

MISSION

To create top-quality competitive products for utmost customer satisfaction

STRATEGIC DIRECTIONS OF GROWTH

1. Customer satisfaction improvement
2. Strategic business development planning to satisfy customers' future needs in quality of products
3. Product line expansion
4. Manufacturing of quality products at minimum cost
5. Increase of employees' interest in development and manufacturing of new products
6. Constant search for alternative suppliers to ensure improvement of finished products' quality
7. Continuous improvement of quality management system to meet customers' requirements

BASIC OPERATING PRINCIPLES

1. Manufacturing of products of higher quality standards in comparison with those available in the market
2. Customers' satisfaction by meeting their requests for products' quality
3. Continuous customer interaction to address their requests for products' quality
4. Employees engagement in improvement of products' quality
5. Constant development and manufacturing of new products exhibiting unique properties and enabling AESW to make such offers to customers which will increase their competitive advantage

BASIC OPERATING PRINCIPLES ARE IMPLEMENTED THROUGH:

- technological advancement ensuring products' quality improvement with reduction of production costs;
- increase of share of high-margin products and high process stage products in total output;
- enhancement of competence for tests and analysis of product quality indicators during and after production;
- production growth through technological advancement, labour efficiency improvement and equipment upgrade;
- building mutually beneficial relations with suppliers focused on joint development of products' quality;
- continual improvement of quality management system effectiveness;
- certification of products and maintenance of certification.
